

## QRG Feedback - Summary Report Online Review Platform

### 21 Responses

2021

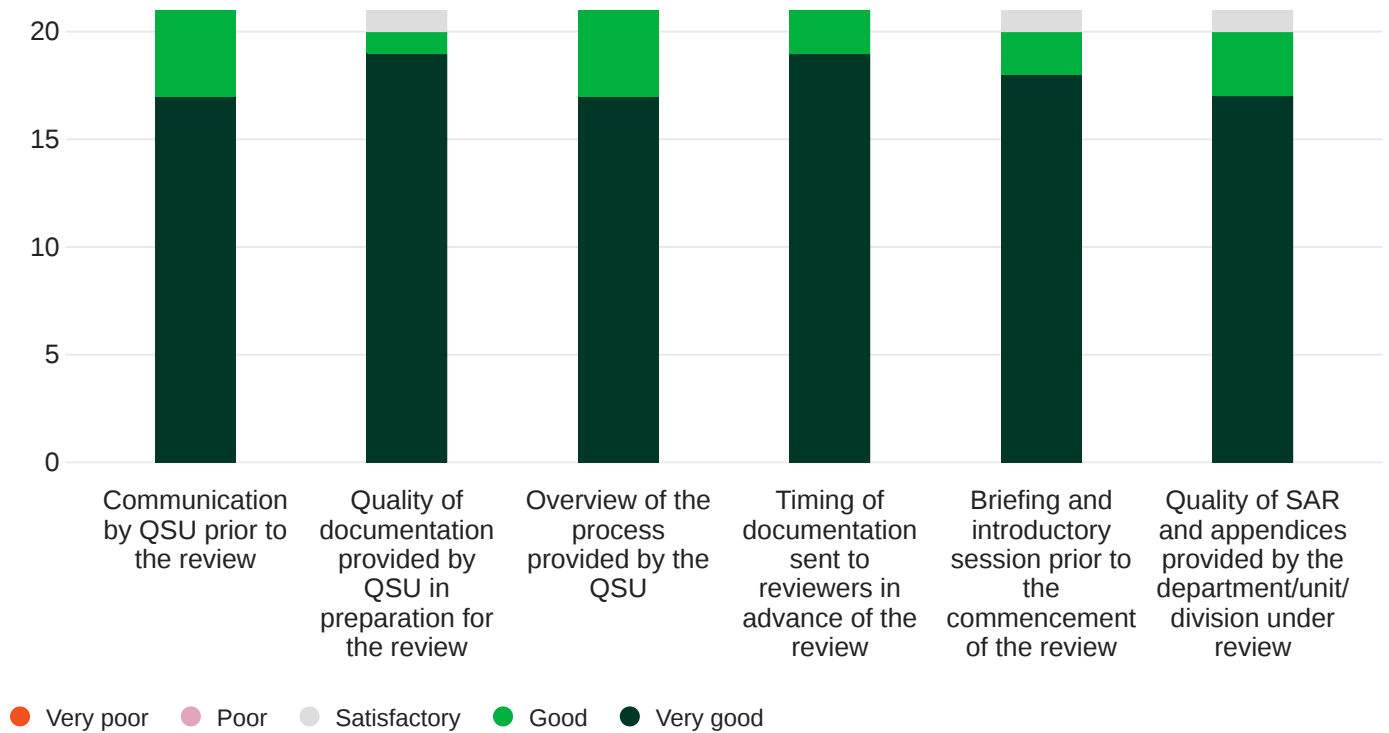

The [Quality Review Process](#) at the University of Limerick is one of the University's cornerstone quality assurance mechanisms. Cycle 3 quality reviews commenced in 2018. The cyclical review schedule, which is available [here](#), incorporates faculties, research institutes, academic and support units and affiliate units. Tailored quality review guidelines are compiled for each stream of reviews and are available [here](#).

Four reviews were held in 2021, all of which were conducted virtually on MS Teams: Faculty of Arts, Humanities and Social Sciences (February), Information Technology Division (May), Bernal Research Institute (November) and Human Resources Division (December). As part of our ongoing quality assurance activities, the Quality Support Unit (QSU) conducted a post-review survey with the various quality review groups (QRGs). A total 26 (13 national and 13 international) reviewers were surveyed, of which 21 responded, giving an overall response rate of 81%. This brief report outlines the key survey findings and the proposed actions to address issues identified.

## Quantitative results

Prior to the review - Please indicate how you found the following:

## Overall effectiveness of the quality review process

Respondents were asked "As a quality assurance tool, how effective did you find the review process". 69% of respondents answered this question and considered the review process to be either very effective or effective as a quality assurance tool.

As a quality assurance tool, how effective did you find the review process?

● Effective ● Extremely effective

## QSU process enhancements on foot of reviewer feedback

### Schedule:

- Ensure QRG Chair adheres to the allotted breaks in the schedule for the benefit of all participants.

### Process:

- Reassure unit under review that potentially probing questions by the QRG will be asked, and should be answered, in a friendly and non adversarial manner.
- Arrange an introductory meeting for the QRG prior to the commencement of the review and provide a comprehensive overview of MS Teams site and relevant documentation.
- Work with unit to agree suitably worded communique when inviting stakeholders so that they are fully aware of why they are being asked to participate. (To elicit their views on their interactions with the unit under review)
- Review the current format of the feedback session to unit staff, whereby commendations and recommendations are read by the Chair. Consider giving a summary of the main outcomes of the process.
- Consider using a template approach to the SAR for academic units, as is currently the practice with professional service departments.
- Offer a demonstration session on Teams for those reviewers not familiar with the platform. This should take place after the SAR is uploaded to Teams, and should be separate to the planning meeting.
- The addition of a clear University hierarchy matrix to the briefing documentation for the QRG.

Timeframe: Where possible, process enhancements are undertaken after every iteration of feedback. Where suggested enhancements have not already been implemented, outstanding actions will be considered for future quality reviews, commencing in September 2022.

The Quality Support Unit would like to thank all of the reviewers who took the time to provide such comprehensive feedback.

Ruth Corless
