

## Promoting Health in Sports Clubs in Ireland : lessons learnt from a Marie Curie Fellowship

## Aurélie Van Hoye & Catherine Woods

"This project has received funding from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement No 101028401"

## What is a Marie Curie Fellowship?

A mobility program for post-doctoral researchers

- Up to 8 years post-PhD
- Funded by the European Commission
- Under the supervision of a leader in the field

=> To build your independency on your research

# Why did we set up this project?

• 2015 • 2018 • 2021

Data source: 2015, 2018 and 2021 Physical Activity Factsheets for the European Union Member States in the WHO European Region.

EU Physical Activity Monitoring :

https://apps.who.int/iris/bitstream/handle/10665/345335/WHO-EURO-2021-3409-43168-60449-eng.pdf?sequence=2&isAllowed=y

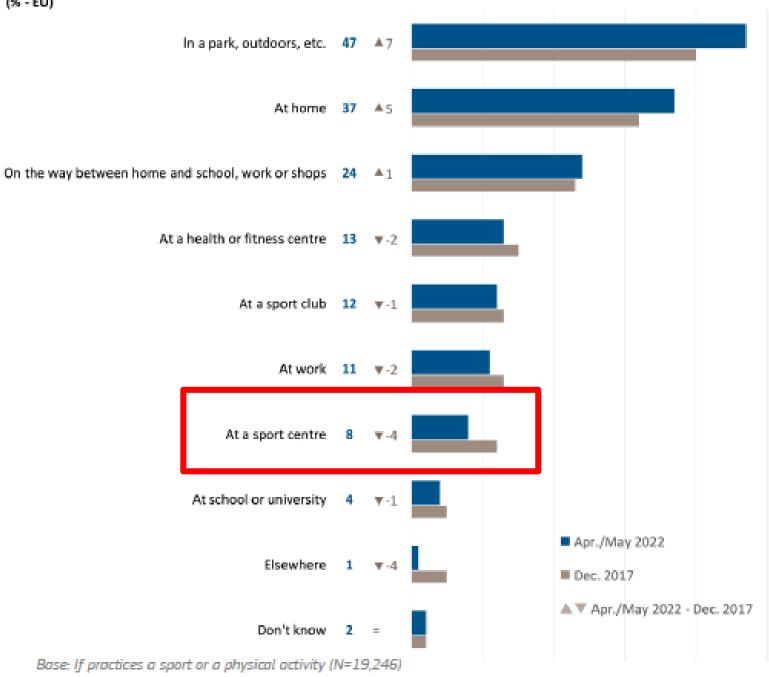

## Why did we set up this project?

QB10 Earlier you said you engage in sport or another physical activity, vigorous or not. Where do you do this? A sport club is an organised setting (for example karate club, football club). A sport centre is more generally a place where people can do different sports (e.g. playing tennis, running). (MULTIPLE ANSWERS POSSIBLE)

What we planned

# Health Promoting Sport Clubs Policy Audit Tool

# GAA Healthy club policies

# Health Promoting Sports Clubs Policy Audit Tool

# National to local HPSC policy review

What we have done

# Health Promoting Sport Clubs Policy Audit Tool

## **GAA Healthy** club policies

Sports clubs need in regard **HPSC** policies National to local HPSC policy review

Internal sports clubs dynamic

Health Promoting Sports Federation Guidelines

## GAA healthy club implementation

## National to local level

Study 1: Grassroots sports clubs implementation of national to local policies

**Objective:** Identify which national to local policies sports clubs mobilise to promote health

**Method:** Online survey

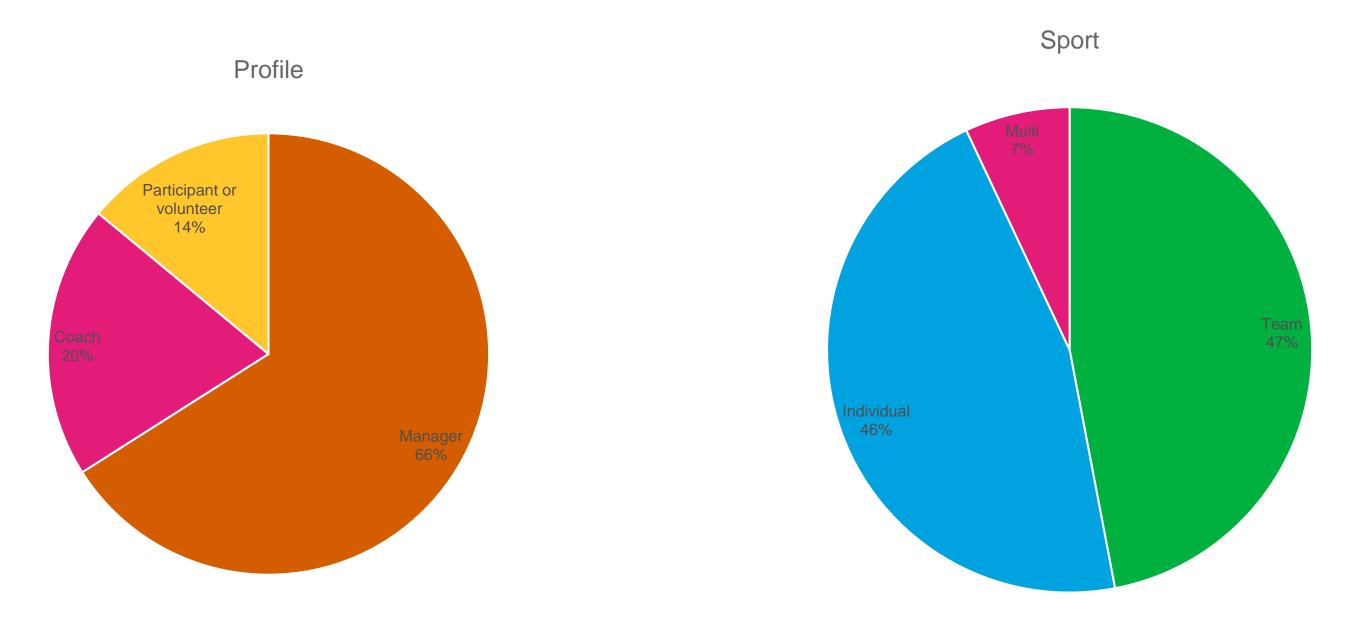

**Club selection :** Invitation to sports clubs by Local Sports Partnerships

**Instrument:** e-PROSCeSS questionnaire, policy cycle

**Data analysis:** descriptives and multi-variate quantitative data analysis and thematic qualitative data analysis

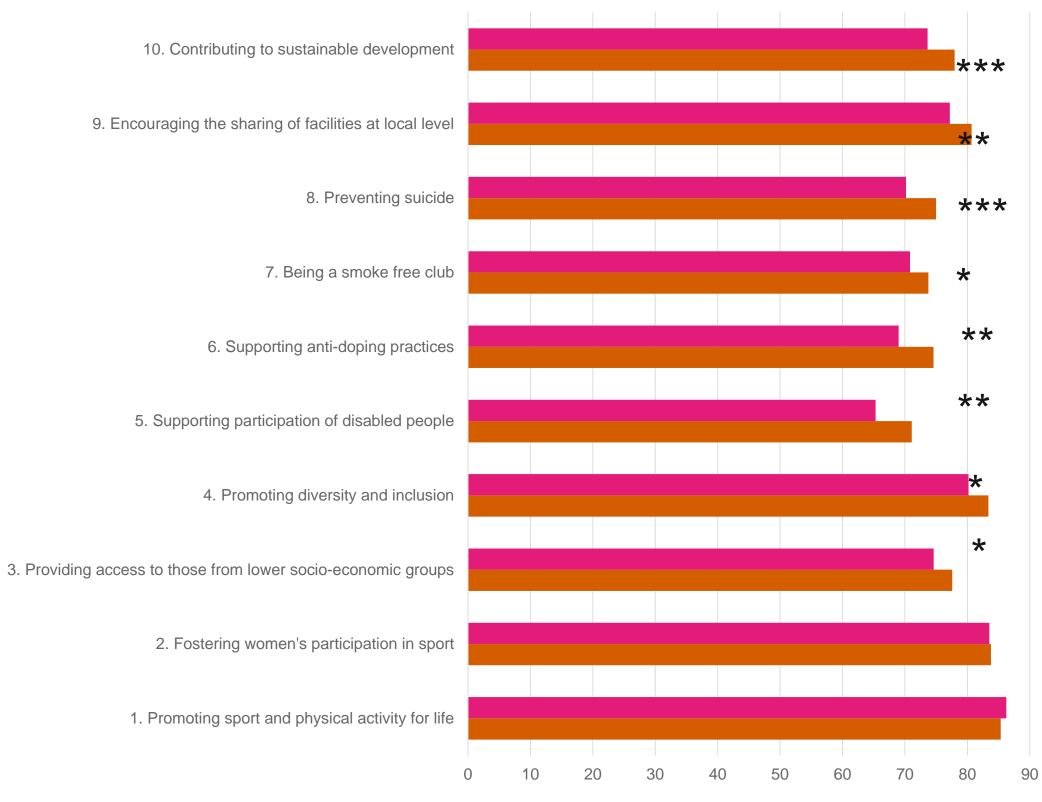

239 answers (77%; 116 women and 121 males; Mage= 33 y.o.)

Percentage on having the health topic as priority or activity

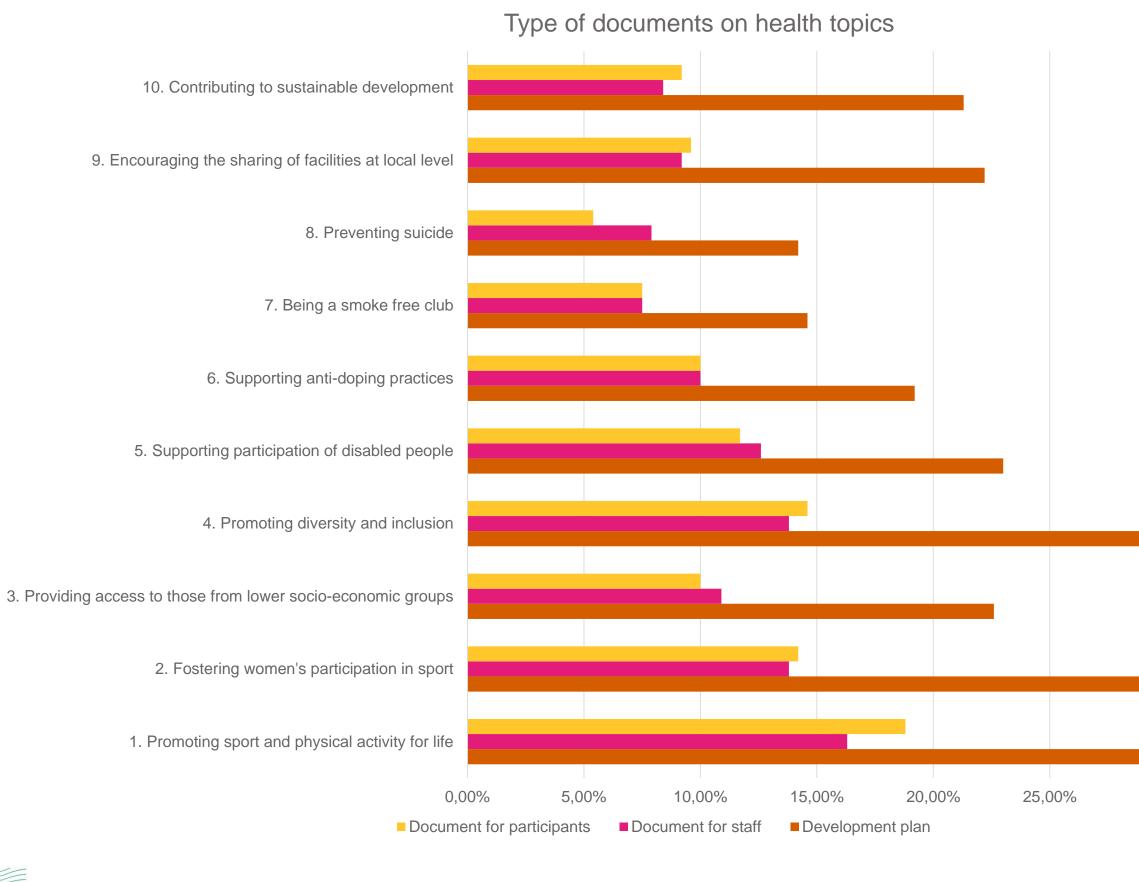

MITTIN.

ActivitiesPriorities

100

Actors: Actors: LSPs, health organization, NSFs, Local Authorities NSFs, Local Authorities Themes with at least 3 Themes with at least 3 quotes: То quotes: Clear agenda To put health Website communicate Club internal discussion promotion on about health Social media the agenda promotion policies Funding Guidelines Human resources To insert Training To evaluate health Advocacy Actors: health promotion in Health organization, promotion sports clubs NSFs, Local Authorities policies development Themes with at least 3 plan Actors: quotes: Sport Ireland, health Clear agenda Club internal discussion organization, NSFs To develop Material and survey Themes with at least 3 quotes: health Clear agenda promotion Club internal discussion activities Actors: Sport Ireland, NSFs Themes with at least 3 quotes:

Material and signage

Event organisation

## Conclusions

1) Sports clubs feel themselves being active, especially towards physical activity and access to sport

2) Only up to 30% have a policy document

1) Support request varied through the policy cycle from National Governing Bodies, Sport Ireland, Local Sport Partnerships, national and local authorities

# Study 2: Analysing GAA healthy clubs policies

**Objective:** Create a list of indicators of policies implemented by exemplar sports clubs

Method: Case study

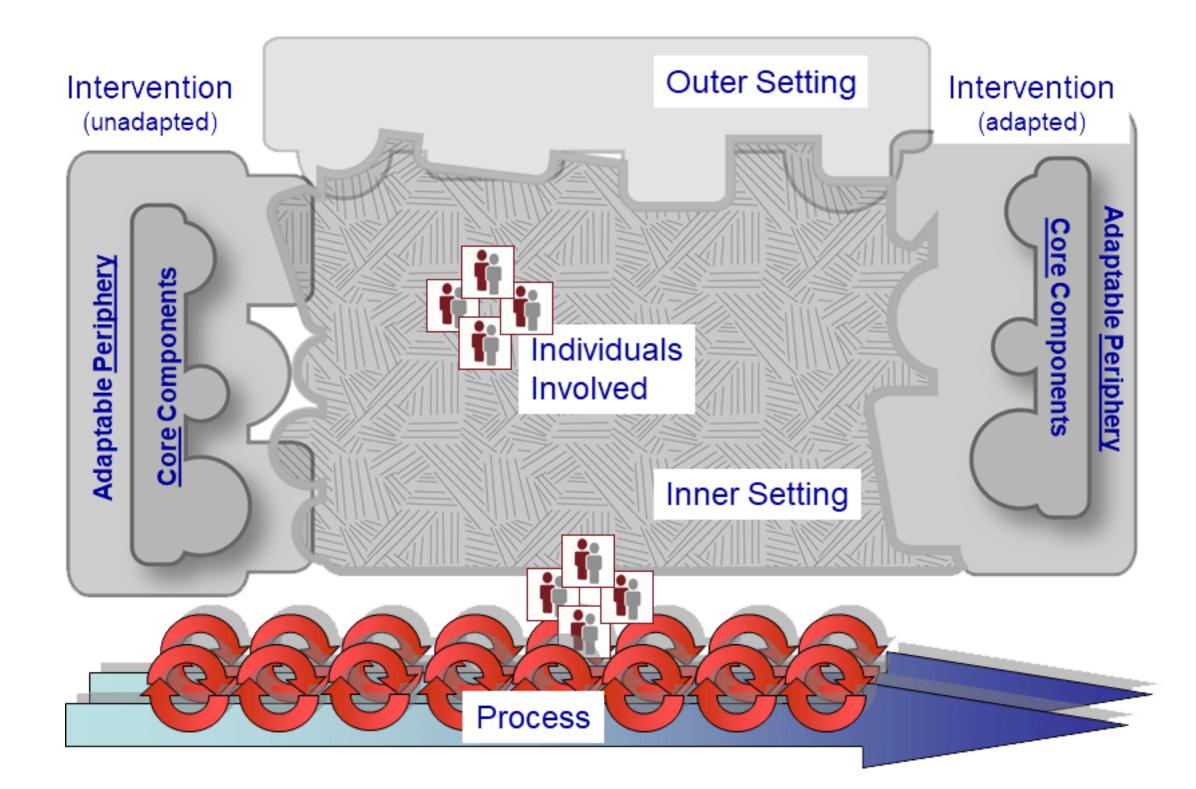

**Club selection :** 16 initial 'healthy clubs' starting 2013 => 5 clubs Data analysis: CFIR framework

## Sports clubs members

## **Consolidated Framework for Implementation Research**

## The Healthy Club Project

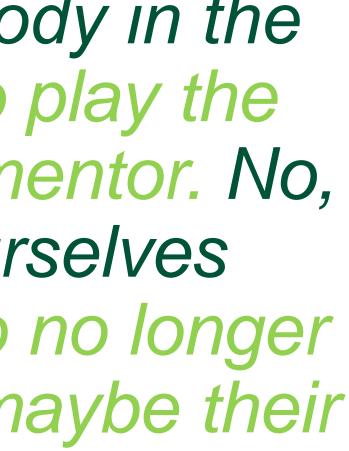

"we try to be something for everybody in the club. It's not just about people who play the games or people who coach and mentor. No, this is for all those and the rest, ourselves being the rest. I mean, people who no longer coach or who no longer play and maybe their kids."

"And we had started a number of initiatives doing exercise classes, and we were doing fruits and things like that. Small initiatives or small projects, but we were, I suppose we were well placed. And we were lucky as well at the time that there was somebody from the HSE through connections, I suppose through my connections, through various connections was interested."

"Yeah. We do have a policy written here somewhere. Yeah, we do have. But, we don't give it to them when they register. No, I'd say it's on our website and it's display outside. In general. Yeah. And everything is online now, so it's yeah. It's something we should be doing code of conduct and all that, but it's up there. We should probably inform people."

## Conclusions

1) Healthy Club project officer position depending on willingness of the club board

- 2) Dichotomy between sports participants core matters and healthy club for community
- 3) Unawareness of the healthy club to all members of the club (and benefits seen only for hard-to-reach)
- 4) Use of already known and packaged programs coming from external or GAA (6-8) weeks)
- 5) Paucity of written planification and few policy implementation

Study 3: Analysis of national to local policies supporting HPSC

**Objective:** Identify and analyse the irish policies supporting HP in sports clubs

**Method:** systematic search and interviews

**Data collection:** 139 document selected and 12 interviews with key stakeholders

**Data analysis:** Indicators present in the HPSC-NAT tool and policy instrument categories

# 17 policy documents

## 49 actions (45 at national level)

16 actions targeting sports clubs directly 26 actions using education and knowledge strategy

## 6 Departments

Health Promotion (4)

Physical Activity (13)

Women in sport (8)

Disabled participation in sport (8)

An HPSC program funded: **GAA Healthy** Club

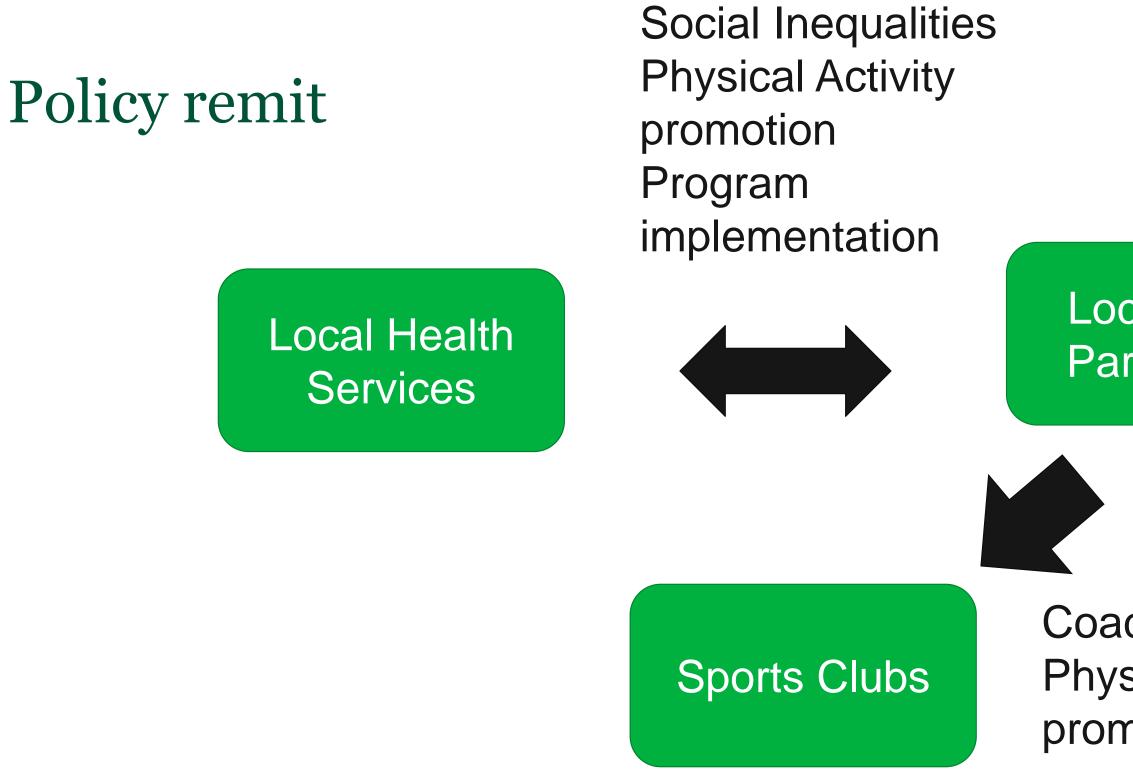

## No national campaign or event

Private company enrolled for policy design, limited consultation

No monitoring system

## A PA coordination (I-PARC) but no **HPSC** coordination

• Health Department has a Tobacco plan (smoke free stadia), where Sport Ireland has antidoping strategies and regulations

## Local Sport Partnership

## **Coach education Physical Activity** promotion

## Conclusion

- Sports clubs are **not recognised as a setting for health promotion by** policy-makers
- A health topic approach (e.g. gender, doping, disabilities) is employed, principally on physical activity participation, but less on making sports clubs environement and system healthier
- **No monitoring, coordination, campaign** support policy implementation
- Policy remit creates gap at local level to support sports clubs investment in HP
- **HPSC NAT** can help you review how health is promoted in sport in your country, as well as policy implementation mechanisms and policy remit

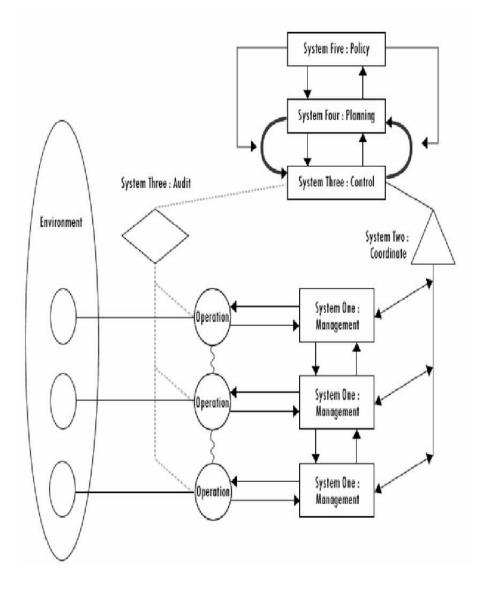

# Study 4: Analysing national to local GAA "healthy club" implementation

**Objective:** Identify which national to local mechanisms to support 'Healthy Club' project implementation

Method: Case study design to inform viable system model

Participant selection: Snowball sampling within healthy club project

**Data analysis:** viable system model (Beer, 1988) and success factor to scaling up intervention (Milat et al., 2015)

## Management

- ▲ Learning process from Phase to Phase
- ▲ Openness to novelty (new topics)
- ▲ Safeguarding clubs from overinvestment
- ▲ Proper use of evaluation
- ▼ Financial and human resources
- ▼Training volunteers in HP
- ▼ Boredom of reporting
- ▼ Cost of evaluation

## Partnership and policy

- ▲ Complementary partners
- ▲ Project present in national health policy
- ▼ Operationalisation of policy at local level
- ▼Recognition of sports contribution to health

## Governance

- ▲ A single referent for clubs and
- ▲ Role clarity
- ▲ Steering community with external
- ▼Ability to implicate county and club board
- ▼Clear definition of task of CHWC
- ▼ Clarification of decision-making
- ▼Cross-collaboration within GAA at national level

## Communication

- ▲ Centralisation of club follow up
- ▲ Community of practice
- ▲ Recognition of volunteers investment
- Duplication of information between county and club

## Conclusions

1) Healthy Club Project met most of the scaling up factors

- 1) Need to work on county level, on task clarification, on effective relationship with HSE (operationalisation of policy at national level)
- 2) Work on internal lobbying within GAA for more transversal approach

3) Advocacy for the recognition of the health promoting sports clubs approach

## Study 5: Health Promoting Sports Federation Guidelines

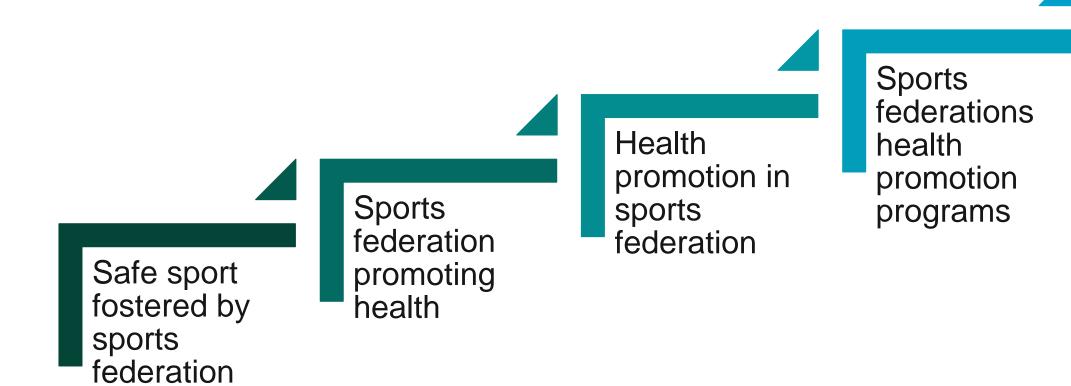

**Objective:** Develop guidelines for sports federation to implement HPSC

**Method:** qualitative iterative study

**Data collection:** 5 2-hours meeting of a group of 15 experts

**Expert selection:** 20 selected experts, based on their implication into health promotion in sport federation

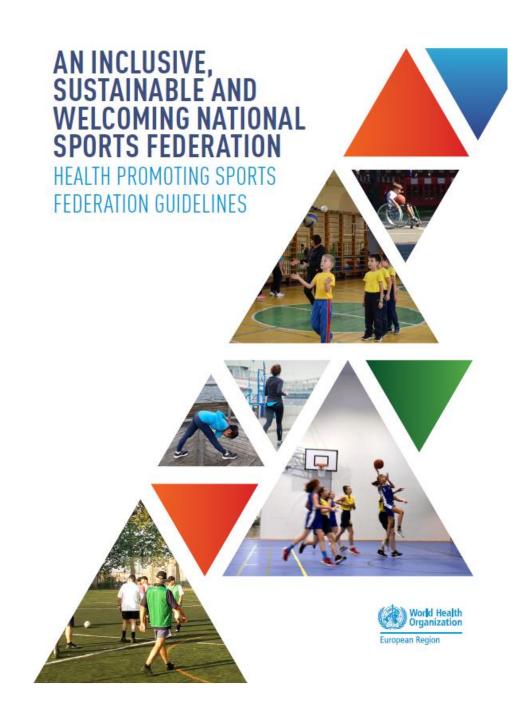

Health promoting sports federation

## Content

Chapter 4: select health promotion toolkits

Chapter 3: implement health promotion strategies Chapter 1: Analyse and monitor HP in your national sport federation

Chapter 2: be inspired by case studies

## Conclusion

1) Creation of the definition of health promoting sports federation

2) Use of indicators to help sports federation to know at which stage they are situated into the health promoting sports clubs stages

3) Provision of toolkits and practical examples for national sports federations

4) Willingness of the World Athletics to test its implementation

## Key findings

1)Sports clubs and sports federation have activities in regard to health promotion, and do identify them as priorities, but not under the HP umbrella and are not equipped in terms of implementation

2)Policies are targeting physical activity principally, as well access to sport, but less on other health behaviors, and the settingsbased approach is not recognised as such

3)All levels (clubs, NGB, local and national level) function in silo, without a health in all approach

# Key challenges

1) Empower sports clubs to think about whole club dynamic, not only at participants level or on single behavior

2) Support NGBs and LSPs in how they can empower clubs for health promotion

3) Create a national coordination, suveillance and monitoring, to mobilise and share responsibilities

4) Finding the proper mixed method to evaluate both process and outcomes

## Lessons learnt

- As a researcher, providing evidence on WHAT works, for WHOM and HOW was key to progress research
- As researcher, adaptations depending on evolution of the state of the art and previous studies is needed
- Being able to document unique practice based program (Healthy Club project) is such a priviledge
- Conducting research in a new environment, language, culture was so insightful to think about my relationship to research
- Two years is enough to produce good research, but not enough to change policies in a unfamiliar country

# Next step of the journey

- Working on evidence that health promotion in sports clubs work
- Using HPSC-PAT in other countries to allow cross-cultural comparison
- Working with International and National Sports Federation to foster club's support

# Thank you
