Product Design & Technology

MINI PROJECT 2024

Design the 'The College Lunch Box of the Future'.

Imagine what students will need to bring to college for a typical day, and design something to allow them carry all their items, so that is easy to use, easy to carry, and stylish.

This may or may not include; a warm box for hot food, an area for wet and/or dry foods, drinks, etc.

Be as creative and varied in your solutions as you can (aim for 5 different ideas).
