

# BSc in Supply Chain Management

## Programme Overview

The BSc in Supply Chain Management is designed to educate learners in the principles and practical application of SCOR framework concepts,

It will equip participants and supporting organisations to gain a competitive advantage and develop the ability to drive improvement in supply chain operations with measurable results.

## Participants will learn to:

- Describe and discuss various concepts of operations management related to supply chain management and grounded in the SCOR model.
- Evaluate performance of supply chain activities and identify opportunities for improvement and integration.
- Respond to rapid changes in demand and capacity by adjusting and optimising supply chain activities.
- Research, evaluate and apply alternative methods to address new issues in supply chain operations.
- Use operations management models and best-practice techniques to address new or emerging situations and changes.

2 years part-time  
(Online)

## Programme Content

### Year 3

Semester 1	Semester 2	Semester 3
Advance Model and Frameworks for SCM	Source within Supply Chains	Lean Sigma: Improvement Methodologies
Plan with Supply Chains	Delivery and Return within Supply Chains	Supply Chain Dynamics Game
Make within Supply Chains	Business Intelligence and Decision Making
