### **BBS Student 2024**

As I approach the end of my final year in the BBS program at KBS, I find myself reflecting on the transformative journey I've undergone. My time at KBS has been filled with academic growth, personal development, and the formation of friendships that I cherish deeply. Being part of KBS, a school that prides itself on being triple-accredited, added an extra layer of fulfillment to my academic pursuits. It wasn't just about prestige but about being part of a community recognized for its excellence—a testament to the quality of education and the opportunities it presented to the students.

From the very beginning, UL captivated me with its vibrant campus life. The diversity and vibrancy of clubs and societies—opened a new world of interests that I could easily explore. It was within these groups that I met some of the most incredible people on this journey, who have honestly enriched my life beyond in many ways. The supportive and engaged nature of everyone at UL, from the faculty to my peers, played a pivotal role in my personal and academic development. This environment encouraged open dialogue, collaboration, and mutual support, which was instrumental in overcoming challenges and achieving my personal goals.

An integral part of my education was my internship at KBS which enriched my student life with practical experience. This internship allowed me to apply my classroom knowledge in a real-world setting, challenging me and enhancing my understanding of business practices. It was a rewarding period that bridged the gap between theoretical learning and practical application in the business field.

Looking back, my experience at the University of Limerick has been nothing short of extraordinary. It's a chapter of my life that I will cherish forever filled with growth, learning, and unforgettable memories. To those embarking on this exciting journey, I would say: embrace every moment, UL is not just a place to learn; it's a place to truly find yourself.
