2022 UL Student Exit Survey
Summary of Institutional-level Findings

Introduction

The University of Limerick annually surveys students who are due to graduate from taught programmes during the survey year. Running since 2009 and known as the 'exit survey', the questionnaire is broadly based on the UK's National Student Survey but is customised to meet the needs of UL. The survey comprises 77 questions, 68 of which are quantitative Likert-style questions and the remainder of which are open-ended.

The 2022 exit survey was launched online in April 2022 and was available to students until the end of October 2022. A total of 5,878 students were invited to participate; the response rate was 19% overall with 23% for bachelor's programmes and 15% for non-bachelor's programmes.
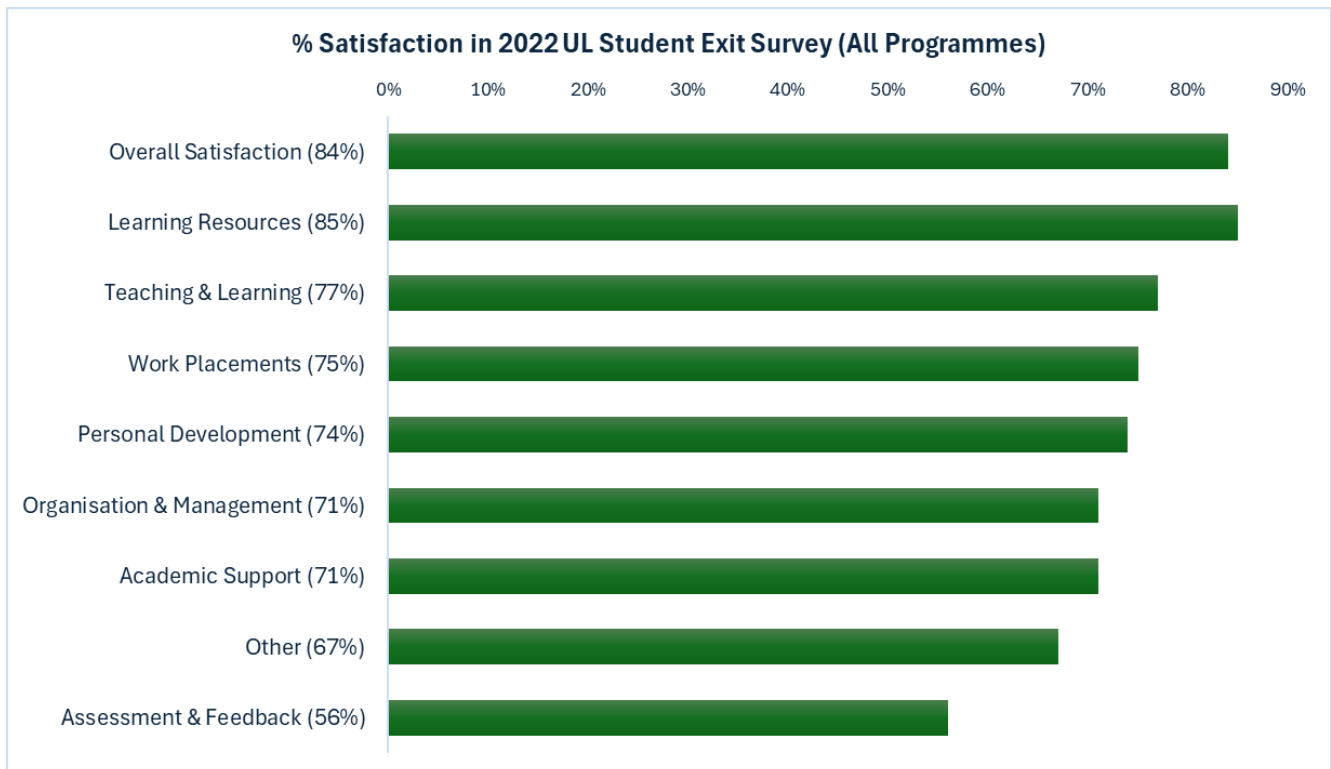

Reporting Structure

From 2021, reports were delivered on the university's PowerBI platform with access as follows:

- Individual programme data available to the lecturer listed as course director.
- Heads of departments/schools receive data on all programmes associated their department/school.
- Deans receive data on all departments/schools associated with their faculty.
- Executive Committee and Academic Council access to aggregate data for the university.

Institutional-level Findings

For overview reporting purposes, relevant survey questions are grouped into eight analytical scales, as shown below.

% Satisfaction in 2022 UL Student Exit Survey (All Programmes)

- Overall Satisfaction (84%)
- Learning Resources (85%)
- Teaching & Learning (77%)
- Work Placements (75%)
- Personal Development (74%)
- Organisation & Management (71%)
- Academic Support (71%)
- Other (67%)
- Assessment & Feedback (56%)

The University of Limerick wishes to acknowledge with thanks the cooperation of all students who completed this survey.
