

Module Satisfaction Survey, spring 2016 Summary of institutional-level findings

Introduction

In accordance with published policy and procedures (accessible [here](#)), the University of Limerick regularly undertakes a module satisfaction survey (MSS) of UL students. In March 2016, MSS requests were distributed to UL students who were undertaking one or more modules that semester. This represented some 51442 individual requests to almost 13000 students taking one or more of approximately 1170 current modules on offer. Some 17500 responses were received, which represents an overall response rate of 34%.

Reporting structure

- Individual module reports are available to the lecturer listed as being responsible for the module.
- Heads of department have received an interim report detailing all departmental modules (copied to the faculty dean). A final, detailed report will be made available to them within 2 weeks of survey closure.
- Executive Committee will receive a report summarising departmental and faculty-level aggregate data within a month of survey closure.
- This publically available report provides a summary of institutional-level survey findings.

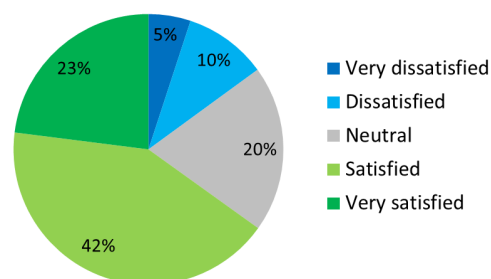

Institutional-level summary findings

In the case of MSS question 1 (“All things considered, how do you feel about this module?”), 65% of respondents indicated satisfaction, 20% recorded a neutral response and 15% registered dissatisfaction.

The chart below summarises the institutional average and values recorded, on a scale of 1 to 5, for each question

(1 = very dissatisfied, 5 = very satisfied).

Q1 - All things considered, how do you feel about this module? (3.7)

Q2 - All things considered, how do you feel about each of the following aspects of this module?
